Abstract - The main use of crowdsourcing is the efficient way of getting several relevant ideas and information for the business. Crowdsourcing can also generate several uses and benefits over the process of internal ideation and business process that will not only access the ideas, but they could drive the marketing buzz and engage several customers. Furthermore, crowdsourcing is also impacting several marketing strategies through generating the idea to several consumers. Furthermore, there are several benefits and challenges of crowdsourcing for an organisation such as adopting the vision that can guide the efforts of idea generation. It states that the idea generation always starts with the shared vision of defining the focus areas and innovation processes. The linking of the ideation for strategic focus area and innovation portfolio is important as the organisation should be implementing the idea management within a structured manner. However, it is also found that several companies embrace the program that is aimed at the idea management for having successful innovation behaviour.

Keywords— Scalability, cross-cultural business environment, Cultural diversity, crowd drafting

1. Introduction

Crowdsourcing allows several companies to farm out the work to several people that are anywhere within the country or globally. It helps a business of a company to tap into the vast array of expertise and skills by not incurring overhead costs of associated employees. Furthermore, by crowdsourcing, a business organisation clears several terms and conditions for an exercise, this approach takes less time than the process of traditional ideation and people might focus on other exciting things. Crowdsourcing also uses social media or any other digital communication as a source to fast new ideas, information and feedback on services and businesses. This research also includes the uses of crowdsourcing in a business organisation with its challenges and benefits.

1.2 Use of Crowdsourcing in a business organisation

Crowdsourcing is used for new innovation and generation, and it can easily help several small businesses. The main benefit of crowdsourcing is getting several ideas from any group of people that are directly related or interested in a business. The ideas of crowd sourced from the consumers can give several views about the organisations and the ideas are totally used for the improvement of the business. Crowdsourcing can be an example of the environment by using the collaboration for enhancing several relationships and capabilities to accelerate the new innovations (de Mattos et al. 2018). Furthermore, crowdsourcing also allows several employees to anonymously answer about the work environments of a company. It aims to better assess and also integrate the practices of healthier work. In addition, crowdsourcing helps the business in performing several tasks more quickly and efficiently than any employee. It breaks projects into segments and gives the pieces to several workers that can expedite the completion of the project. Crowdsourcing is also used for economic advantages for both larger and smaller organisations. In addition, if the organisations are not having any required people, then crowdsourcing helps the employees with necessary skill sets for performing several tasks. Crowdsourcing describes several projects within any task that can be collaboratively solved by several people, and this might be the research group for larger companies of the Internet users (Rasp et al. 2018). Furthermore, there are several types of crowdsourcing such as Crowd Processing, Crowd Solving, Crowd drafting and Crowd creating.
The approach of crowd processing relies on several crowds for performing large quantities of several homogenous tasks. In addition, the approach of crowd solving is used for the diversity of several crowds for finding the larger heterogeneous solutions to associated problems. The system of crowd drafting is commonly used for seeking to harness the wisdom of crowds for performing collective predictions and assessments (Morschheuser et al. 2017). The solution of crowd creating is for generating the comprehensive artefacts that are based on several varieties of the heterogeneous contributions. However, by crowdsourcing various decisions are made for inviting several employees for voicing the ideas of managers and managers could help them in gaining a better understanding of the expectations of the employees and also their own biases. In addition, this process can be helpful in mitigating several risks for releasing the unsuccessful products and also releases the main products by seeing the requirements of several customers.

1.3 Benefits and challenges of Crowdsourcing in an organisation

The idea generation that is crowd sourced might bridge the gap that is between stimulating the capabilities of internal innovation for an organisation and also identifying the future disruptor of an Industry. In addition, the main key of having a shared understanding regarding the goals of crowdsourcing and also the top management also support in both factors that is focus area and vision. The relationship between crowdsourcing and market orientation within the knowledge-based firms is for improving the overall organisational performances (Devece et al. 2017). Another benefit is focusing on the innovation vision that is into several projects and concrete challenges and by having the shared vision, the vision is translated into the concrete challenges for several employees.

Another benefit is setting up the structured approach for any idea challenge and for leveraging the overall wealth within the internal ideas in an effective manner. The main benefits of crowdsourcing for the governance structure and also the self-organisation process within the natural disaster is reflected by several perspectives. The perspectives are strengthening coordination and communication, optimising the emergency process of decision making and also improving the capability for adapting and learning (Song et al. 2020). Another benefit is enabling the further development of several ideas and the main successful crowdsourcing of several ideas is by higher ideation rates.

The process of adaptive spacing is required and it is totally defined as the main network and also the organisational context and it allows several pieces of information, resources, ideas and people that also flow across the organisation. Crowdsourcing has the mechanism of open innovation by several organisation seekers, and it also engages with the external crowds of several potential solvers (Randhawa et al. 2019). Therefore, organisations are trying to build up with new innovation and digitalisation for secure crowdsourcing.

2. Methods and materials
The methodology has helped to design the research study to find the actual result. Along with that, this research study has obtained secondary data to understand the role of crowdsourcing in an organization. In this regard, this research study has selected previous research papers which were published five years ago. In this regard, “Crowdsourcing is a Public Organization: Transformation and Culture” research paper has conducted primary data analysis. Along with that, this research study has selected 37 employees in an organization to collect data about crows rising (Wagenknecht et al. 2017). Along with that, this research study has selected a survey method to analyse the importance of crowdsourcing in the organization. In this regard, through a survey, this research paper has collected the opinion of employees about crowdsourcing. This research study has analysed quantitative data through measuring parameters. In this regard, this research study has chosen some measuring parameters to understand the satisfaction level of the employees through crowdsourcing in the business organization (Wagenknecht et al. 2017). In the present time, business organizations have the opportunity to overcome the problems of the organization easily through the implementation of crowdsourcing that helps to enhance the satisfaction level of employees in the organization.

3. Result and discussion

3.1 Secondary analysis

Thematic analysis

Theme 1: Role of crowdsourcing in an organization
In the organization, crowdsourcing plays the most important role to impose improved costs, quality, speed, flexibility, scalability, and diversity. In the words of Randhawa et al. (2019), crowdsourcing has provided facilities to the organization to accumulate workers from anywhere in the world. In the business organization, skilled and expert workers have helped to improve organizational performance. Along with that, Crowdsourcing provided opportunities to the organization to select skilled and expert workers from different regions. In the present time, most business organizations have faced difficulties due to cultural differences in the international marketplace. Along with that, crowdsourcing has helped to implement a cross-cultural business environment in the business organization to maintain cultural diversity that provides better profit to the business organization. For example, organizations such as Tata Communication around the world engage into crowdsourcing. Moreover, crowdsourcing has helped to manage the costs of the business organization through the adaptation of paid freelancers. On the other hand, another most significant role of crowdsourcing in the business organization is maintaining flexibility (Rasp et al. 2020). Cultural diversity has helped to provide a flexible work environment in the organization.

Theme 2: Importance of crowdsourcing to improve management of the organization
In the present time, crowdsourcing has provided an easy solution to the problems of organizations. Crowdsourcing has provided priority to the experts for external challenges of the business organizations. Along with that, business organizations have more profits and improve the efficiency of the organization effectively. On the other hand, providing priority to the customers to increase organizational business is in the marketplace that helps to increase the profit of the organization (Devece et al. 2019). In the business organization, the internal structure is one of the most significant factors that help to manage the entire performance of the business organization. Along with that, crowdsourcing has helped to improve problems of the business organizations. In the business organization, crowdsourcing has provided software facilities and internal change of the organization that help to improve organizational performance effectively. On the other hand, in the business organization, the decision-making process has helped to take effective solutions for solving problem essays (de Mattos et al. 2018). Along with that, crowdsourcing of the business organization has helped to maintain diversity and a flexible work environment that helps to solve problems of the organization easily.
Along with that, a previous research study has analyzed among 37 employees, 45% of employees are reported that crowdsourcing provided high perceived usefulness of the organization. Among these employees, 40% of employees are provided undecided and 15% of employees reported low usefulness of crowdsourcing in an organization (Wagenknecht et al. 2017). Along with that, it can be decided that most of the employees have provided high satisfaction with crowdsourcing. In the business organization, a high proportion of the employees agree that crowdsourcing provides a better working environment in the business organization.

5. Conclusion

After all these discussions it can be concluded that crowdsourcing plays the most significant aspect that helps to manage the entire performance of the organization effectively. In the present time, business organizations have faced different issues such as high rates of cost, cultural differences, and others. On the other hand, business organizations have implemented paid freelancers to reduce the cost of the organization. The most effective advantage of crowdsourcing is the adaptation of cultural diversity and flexible business environment in the organization. Along with that, the organization got the chance to satisfy employees successfully.
